Portfolio LinkedIn

Professional Summary

Computer Engineer with hands-on C# software development experience in Unity and object-oriented application development, including a mobile game that reached over 100,000 downloads. Experienced with OOP, SOLID principles, design patterns, Git/Bitbucket, algorithms, debugging and performance optimization. Interested in applying software engineering to complex technical systems and working across software, measurements and engineering domains. Currently based in Darmstadt, Germany.

Technical Skills

Programming Languages: C#, Python, Java, C, JavaScript
Software Engineering: Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Algorithms and Data Structures, Debugging, Performance Optimization
Development & Version Control: Git, Bitbucket, Unity, Zenject
Testing & Quality: Software Testing Fundamentals, Integration and Functional Testing, Performance Analysis
Additional Technologies: REST APIs, JSON, HTML, CSS, OpenXR, VR Development, LLM Integration, AI Agents

Current Studies

Language Student – M.Sc. Computer Engineering 2026 – Present
Vertiefung: Interactive Systems and Visualization, im Rahmen des International Studies in Engineering (ISE) Programms
Universität Duisburg-Essen

- Enrolled as a Language Student ahead of full master's program admission, focusing on academic and technical German.
- Building on an undergraduate foundation in Computer Engineering with a focus on interactive systems and visualization.

Professional Experience

Game Developer Intern – No Surrender Studios Jan 2022
İzmir, Türkiye

- Designed and developed a 3D hyper-casual mobile game in C# and Unity that reached over 100,000 downloads.
- Developed object-oriented gameplay components and core systems, including knockback mechanics, using the Zenject dependency injection framework.
- Debugged and optimized application performance through targeted C# scripting improvements, reducing load times and improving runtime behavior.
- Integrated and deployed the application for Android, validating functionality throughout the development and release workflow.

Web Management Intern – EXVAPE GmbH Jan 2023
Illertissen, Deutschland

- Contributed to UI design and implementation work for web portals, infographics and e-commerce interfaces.

- Collaborated on customer-centered UX concepts and supported planning of technical/design workshops and presentations.

Operations Manager – Çiçek Sünger Feb 2024 – Present
Buca, İzmir

- Coordinate daily operations, workflows and documentation while adapting to changing priorities and operational requirements.
- Oversee financial tracking, invoicing and reporting with a strong focus on accuracy and process quality.

Projects

Algorithm Thesis Project: Pathfinding in Games

- Implemented DFS, BFS and A* algorithms within interactive game environments and analyzed their behavior across gameplay scenarios.
- Compared algorithm performance and solution characteristics, applying data structures and algorithmic problem-solving to real-time applications.

AI Agent & Browser Automation Projects

- Developing Python-based software agents integrating LLMs, REST APIs, structured JSON data and browser automation workflows.
- Building automated task flows with emphasis on modular implementation, debugging and reliable interaction with external systems.

Personal Portfolio Website **View Site**

- Built and deployed a responsive portfolio website via GitHub Pages to showcase software and Unity projects.

Education

Bachelor of Engineering in Computer Engineering 2023
Muğla Sıtkı Koçman University
GPA: 3.2 – 251 ECTS
Thesis: *Use of DFS, A*, BFS in Games*

Certifications

Goethe-Zertifikat A1 2026
Overall Result: 90 / 100 – Grade: *Sehr gut (Very Good)*
Full-Stack Web Developer Certificate – MEXT BİL-İşim Eğitim ve İstihdam 2022
Game Development Bootcamp (Unity)

Languages

Turkish – Native | **English** – C1 | **German** – A1 (in progress)
